# DAMPER UNIT

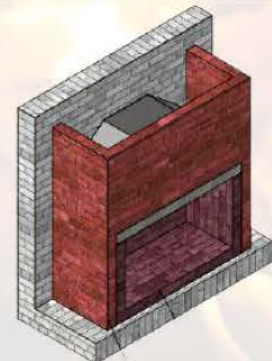

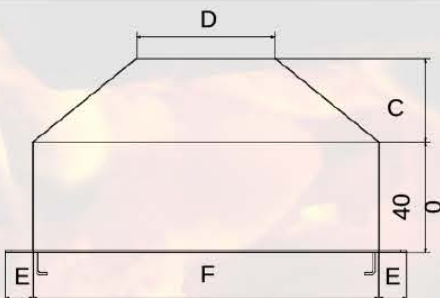

RADIATED HEAT ONLY

## Brick Fireplace Installation

Our high-quality damper units are designed specifically for brick fireplace and braai installations, ensuring an efficient and effective operation. Constructed with a heavy-duty outer body, these units provide exceptional durability and longevity, making them a reliable choice for any setup. The damper control allows for a clean and smooth draw, optimizing airflow for a better fire experience. With the ability to adjust the flow, our damper units enhance combustion efficiency, reducing smoke and maximising heat.
